July 14th, 1983.

To Whom it Mat Concern,

I have known of Bhagwan Shree Rajneesh for many years. I discovered His existence through His lecture books that have been translated into Japanese.

Advanced nations such as America and Japan have developed in the sphere's of economy and materialism. This is the time when all desires can be fulfilled by money, so people have created more desires and become like animals. Juvenile delinquency has become a daily occurrence. Education does not function any more.

In these days the existence of a person such as Bhagwan Shree Rajneesh, helps young people who have lost their way. He is teaching them that it is important to change their direction from outside to the inside. He is ringing an alarm that politicians are destroying. He has started moving against the current of this time. From all over the world people are coming together, coming to Him. There must be something which is attracting these people so strongly to His teachings. He says to use things and to make harmony with different philosophies, to look deeply into oneself through meditation.

In my temple for the inner growth of oneself we practice the Zen method through His teachings. I like to watch Him as one who has looked into the confused world and said what is needed. I wish understanding from whom ever it concerns so that Bhagwan Shree Rajneesh can stay in the United States of America.

Mr Masaaki Monju.
