

20 July 1983

TO WHOM IT MAY CONCERN.

Before I met Bhagwan Shree Rajneesh, I had been practicing for five years as a teacher in Switzerland. I saw how our school did not fulfill the needs of the children and how criminal tendencies already began at such an early child age, because children are treated in a very wrong way. It frightened me to think that all these wrongly treated children would create our future society.

Then I met Bhagwan Shree Rajneesh and became one of his disciples.

Back in Switzerland I went on teaching with the help of my Master's religious message and meditations. For three years now I've been doing just that and extraordinary things are happening. My work is to take over school classes with the very difficult, the so-called "criminal children" no teacher wants to handle any more.

And using Bhagwan's concepts and meditation techniques I have no problems teaching these children or teenagers (from the ages of 7 to 17) all kinds of subjects. They become soft, loving, attentive and interested in the subjects; they are no more interested in teasing the teacher, in fighting or stealing.

I see that is happening only because I'm working with Bhagwan Shree Rajneesh as my inspiration.

A totally new society without criminals could be created if Bhagwan's messages would reach more and more teachers.
