

20th July 1983

To whom it may concern.

I am a doctor, and have studied in Italy, where I received, in 1977, the degree in Medicine and Surgery (full honors) at the University of Palermo. I have worked at the hospital since 1978 (medicine and first aid), and met during this time many people with physical and mental problems, and felt that the therapies used had reached a point where there was no progress any more.

I then met Bhagwan Shree Rajneesh personally in Poona, and in 1979 I started the meditations practised at the ashram; I immediately felt that this person was the only person who - thanks to his totality - could offer the true healing to the modern man.

After I went back to Italy and started working again in Palermo, I felt much more aware of the problems of my patients, and realized that their healing was much deeper and quicker. And I realized that the new vision, the new love that I had acquired being with Bhagwan Shree Rajneesh was the momentum that was bringing about this healing.

Even now, working at the hospital 'La Carita' in Switzerland (a pediatric hospital), I experience the same thing.

I feel grateful and respectful towards Bhagwan Shree Rajneesh for having given me this new dimension in the art of healing, and I realize that He has a depth and an awareness that very rarely has been attained by other human being during the last two centuries.
