TO WHOM IT MAY CONCERN

I studied Mathematics, Philosophy and Psychology in Innsbruck, Austria, and now I am a teacher at a technical high school for Mathematics, Psychology and Computerscience.

I have been teaching for ten years now and I got to know how dissatisfied young people are with the way society makes use of modern technical achievements. Something is wrong with human consciousness. But how to change it? I did not know.

Two years ago I became acquainted with Bhagwan Shree Rajneesh's teachings for the first time. I was surprised and very happy that here exists a Man with such clear insight. Not only this: Bhagwan is also a Man of exceptional abilities and great knowledge in many fields of science and the arts. Bhagwan teaches us how to become more aware and more conscious and by this, how to apply modern technology in a more responsible and reasonable way. This insight which I owe to Him has become part of my work with young people. So my teaching has gained a new dimension which most of my pupils appreciate. Some even say that it has changed their attitude towards life.
