

To whom it may concern

Having frequented seminars etc. at Rajneesh centres and having noticed among his pupils the great and positive influence of his work and message of love, I hereby wish to commend the exceptional abilities within the fields of science and arts which Shri Rajneesh Bhagwan to the best of my knowledge is in possession of. His humanistic approach to life and contribution to mankind should make him a guaranteed asset to the community and country in which he has expressed the wish to settle
