

20 July, 1983

To Whom it May Concern:

I am a registered nurse, with BA in biology and a background of 5 years as a researcher in the fields of lipid metabolism and brain cancer research.

I have known Bhagwan for the past 3 years thru his tapes, meditations, and his Presence, and have found that these contacts have influenced me towards becoming more effective and finding greater fulfillment in my work as a pediatric nurse. I feel more clarity and creativity in my personal life as well.

Bhagwan's exceptional gifts have had worldwide influence. A number of my personal contacts are medical professionals from other countries, like myself, have experienced positive effects in their careers from knowing

Bhagwan. I strongly support
Bhagwan's immigration to the United
States.

Yours Truly,

Shirley Herwater, RN
