

Michael Karagosian,
1034 Del Cambre Ave.,
SAN JOSE, C.A. 95129

TO WHOM IT MAY CONCERN

By profession I am an electronic engineer.

I have a B.S. in electrical engineering and computer science from the U.C. Berkeley, have engaged in graduate work in electrical engineering at the University of Santa Clara, and am a registered engineer in the state of California. I have worked in linear integrated circuit design for several companies in the San Jose area, including work as a design consultant for Memorex, Inc., and I have worked as a project engineer and manager for Dolby Laboratories, where I lead several projects related to the film and recording industries, most notably the development of the stereo "surround sound" equipment used in the Movie "Apocalypse Now".

I began reading books by Bhagwan Shree Rajneesh approximately six years ago when looking for guidance in clear thinking, problem solving, and creative inspiration. Nowhere in any university have I encountered anyone who has such an exceptional understanding of the human mind and such insight in problem solving and creative inspiration. For me, Rajneesh provided the intuitive depth of understanding that has added much creativity to my work in electronics.

The presence of this man in our country is definitely to be applauded. A man with such a keen insight to the human mind is an asset to our culture. Rajneesh is also an internationally recognized spiritual leader, making the United States a natural home for him.

Sincerely,

Michael Karagosian
