I am a Diploma architect, graduating from the Academy of Building Arts, Groningen (1973), and director/owner of Anuras Building Company.

In 1980 I became a sannyasin of Bhagwan Shree Rajneesh.

His deep insight into life has tremendously contributed towards my personal life and my functioning as a director of a building company. Bhagwan's insights into people were very helpful to me in building up a productive Building Company in which the fulfillment and happiness of the workers is as important as the work that needs to be done.

I clearly feel Bhagwan's religious vision of mankind can be a great contribution towards solving the great problems mankind is facing at the moment.

Sincerely yours

FRED.O. D. MEER
