Im Winkel

To whom it may concern

I am 45 years old, and a Swiss citizen. I studied dental medicine at the universities in Lausanne and Basel. Since 1965 I have been a member of SSO (Swiss association of odontologists). In 1978 during a holiday trip to India I stopped for a few days in Poona. Listening to some discourses of Bhagwan Shree Rajneesh I was very much impressed by the way this obviously super-intelligent man was talking to thousands of people of all nations and professions about worldly and spiritual phenomena. Later on I read some of his books of which he has written some hundreds.

I am convinced that this man has exceptional abilities in the fields of sciences and arts. He is an outstanding philosopher and psychologist and a religious teacher with a planetary impact.

Hopefully this creative man can influence many people in the positive and constructive way, as it happened to me.

Sincerely,

Walter Heer
