July 25, 1983

TO WHOM IT MAY CONCERN:

I am writing this letter because I believe that Bhagwan Shree Rajneesh has a deeper understanding of psychology and greater insights into human behavior than any other learned professor or author in this field today. He has produced hundreds of books relative to the psychology of man. His words are instantly recognizable as simple truths.

I've studied psychology at Rutgers University for 3 years (1972-74) and only after reading Bhagwan did I begin to feel as though I was not only learning something but I was able to apply this knowledge to my life. I have an understanding into myself which I never had before Bhagwan, and this flows over into my personal relationships with my family and friends.

Only in retrospect have leaders of significance been appreciated for their contributions to mankind. Why do we have to repeat the same mistakes? Please let this great man stay in our country.

Sincerely,

Beth Ann Budget
