

20th of July -83

To Whome It may Concern:

I am a Swedish citizen, 20 years old, studying to be a medical doctor in Stockholm Sweden, at Karolinska Institutet, beginning my fourth year in September '83. Before being a medical student I was a physical education teacher with a degree from Gymnastik & Idrotts Högskolan in Stockholm. I taught physical education in Stockholm.

Also I worked in the National theater, Dramaten for two years and I have been a travel guide in Greece as well.

When I was sixteen years old I came for the first time to the United States on a scholarship from the American Field Service where I learned to appreciate the beauty of this country.

By doing all these things, and now studying to become a medical doctor, I have come to realize the value of such a precious teacher and spiritual enlightened master whom I am a disciple - Bagwan Shree Rajneesh. His continuing presence in the United States can do nothing but add to

Americans prestige with her deep appreciation
of religions and intellectual freedom!
