

To Whom It May Concern. E

We the undersigned, having had much experience with counselling and supportive therapies in the fields of psychology and healing over the past thirty years or more, have no hesitation in declaring that the work encouraged in these fields by Bhagwan Shree Rajneesh is exceptional, innovative, and far-reaching in its effects.

Many of his ideas and teaching are now finding acceptance in the broad international community, and the results of his training and practice since the transfer from Poona, India to Oregon, USA are coming to fruition in Rajneeshpuram.

We have also become aware of Bhagwan's abilities because of the changes we have seen in the last year or two in the development of our two children, their spouses, and our grand Not only are they all obviously happy and fulfilled by their involvement, but their mental and physical health and abilities have improved and expanded at an amazing rate.
