Dear Friends,

I have been a teacher in Special school and an artist. I have done Oil paintings and baticks as my hobby. for a long time and I have also served my community for sometime and given honor able place to serve.

I came to know Bagwan in a strange way. My search was long for truth before I met Bhagwan. I use to go to many places and temples to listen to religious people. Also I was detterminded to find truth ~~pr~~ by practising moral rules and studying human psycology and today's science and its search on these fields.

I tried to find out views of phylasophers like Bertrand Russel and through many religious philosophy

My own life was not all bed of roses. I felt life unbearable as time passed. There were many desires and aims to fulfil. But time seemed to go out of my

hand. Future seemed uncertain. Life seemed cruel and meaningless. In this state of mind I suffered from "nerves". Doctors gave me tranquilizers. It did not help much.

I realised exactly what was the cause of my nerve. I needed inner peace. Without inner peace it was useless to take tranquilizers.

At that point a great realization dawned upon me - to see within myself "Who am I?" What is life? What is a man and what is he doing to his life. I think man has many questions to ask pertaining to himself. Men have traveled far from himself. He wants to know the moon and sun and planets. But he has never learned to see what lies within himself. But now he must learn from Bhagwan what he says about a "man", before it can be too late.

For many centuries there has not been a man like Bhagwan. Through my findings,

When I first heard Bhagwan's tape something stirred in my heart. I knew "This is it".

Since then I have been reading his ~~tapes~~ books and listening to his tapes, and have become his lover. I am a Sanyasi.

My life is changed. He has given me a vision - a new perspective to see this glorious world of beauty and spland

He has given me a new heart to feel - love, and compassion for everybo men, animals trees and the smallest creature on earth. I feel a new bein arising within me. My relatives are surprise to see the change. and the peop around me feel it too.

I now try to explain to so-tos religious people what it means to be really religious.

The cloud of the third world is looming upon us and there is no solution between big powers to come to peaceful means

Bagwan can become an internatic figur to ~~save~~<sup>save</sup> this world from the clutch of Nuclear disaster. God is flowing through him.

Humanity is still groping in his unconsciousness and has not reached to higher level of consciousness. If we miss Bagwan then it will ~~last~~ take many centuries to come to have a man like him in our midst.

Men needs religion. That is why,

4.

he is clinging to dead religions which are more like organisations. He is clinging to a dead corpse.

When Jesus said men will resect. Perhaps he ~~meant~~ meant to resect from this dead corpse. It is time for us to resect from this death of our soul which we are unknowingly going through.

This is the day of Judgement to accept Bagwan or not!

Mai Anand Sureya.
