

august 7 - july 1983.

To whom it may concern

I have been in our Religion Festival
this year from 1 - 9th july
I was very much amazed to experience
the beauty of human being.

To see and to experience in an
energy - field, called Buddhafield, that each
individu became a flower, is 'the world
I like to live in, and I know that
this is possible, only with our
Living Master,

I love him very much
I really love him

And all the therapeutic courses, all the
meditations, the worshipping and festival
creat an energy field in which this
flowering happens

I would like my Master to live in America
Oregon is beautiful
and the Americans are very much selfsup-
porting, there for we can coöperate

I hope you can do the best for our
living Master, who has become so healthy
in Oregon and so happy

And I would like to visit him as much as
I can.

much love.

ma and Seva.
