Some years ago I tried to find new literature , that could influence my work as a teacher. So I came to read some books of Bhagwan Shree Rashneesh. Many of his thoughts about education helped me to work more effective at school. It is not necessary to be a sannyassin , to be enthousiastic about Bhagwans philosophy and I am glad that there are free countries, that give support to his important work and a hope, that there are statesmen, which have understood the importance of a personality like Bhagwan Rashneesh.
