July 24th 1983

Working as an occupational therapist for three years I was looking for a further education. The best way to improve my work was doing continuous groups and therapy in centers which were set up through Bhagwan Shree Rajees, and his disciples.

Having got in contact with the ideas and message from Bhagwan Shree Rajees, I came to Rajees, puram for the second annual world celebration.

This was the most extraordinary experience I'd ever had.

Here in Rajees, puram just at the right place I found that Bhagwan inspires the realization of his ideas he wrote in his books, talked about in his lectures with the help of his disciples.

Here is happening such an integration of love, meditation, work, therapy and spiritual growth which is only possible in the energy field of a genius master Bhagwan Shree Rajees in a free country like America.

His presence creates a Buddha field in which extraordinary things are possible where my mind is far away to express it.

Specially for my work as an occupational therapist I had the possibility to experience myself doing different sets

of work at the ashram in a very clear mirror.  
I can take back a lot of love and laugh,  
acceptance, silence, little organisation that is the  
way the work is done here.

If I look around me I see people and myself  
growing getting healthier, more loving, sharing  
their emotions and taking responsibilities at  
the work with such fun so that this beautiful  
living space can grow.

This is only possible here and now with the  
presence of this genius master Bhagwan Sri Rajeev  
who is a real gift to humanity and transcends  
limits that he hopefully can live here in America  
a free country.
