Testimony

I Sukhendu Das citizen of Canada and North America  
Here by declare the following statement regarding  
Bhagawan Shree Rajneesh.

I consider Bhagawan Rajneesh as the greatest teacher  
in Flesh and Blood living in this world today. Through his  
works I have learnt to love all my fellow human beings.  
Being treated as a second class citizen by my white brothers  
and sisters in North America (for I am Indian) it had been  
hard for me to respect and love my oppressors. Until I  
became enlightened by following Shree Rajneesh's teaching's  
and philosophy which taught me how to truly love and respect  
all my fellow creatures including those who discriminate me  
on the basis of my color, race and religion. I consider  
this one single effect of his teachings that could be the  
greatest contribution to mankind.

Shree Rajneesh has successfully brought about a very  
harmonious understanding between peoples of different faith  
and background - such people include catholics; jews;  
protestants; muslims; atheists and hindus. I have witnessed  
people of such diverse background who have been following  
his teachings - Living together in perfect peace and harmony.  
I hope shree Rajneesh will continue to do his work in North  
America and hope all peace loving people will give their  
full support to further his mission in a free society.
