

Cadenazzo, August 4, 1983

To whom it may concern:

Last months in June and July I went to Oregon to attend the second annual world celebration of Bhagwan Shree Rajneesh and to visit the new city of Rajneeshpuram/ Oregon.

It's very difficult to express by words the sensations I had throughout the period. I experienced emotions of deep peace, love and serenity. The disciples of Bhagwan work in a way which impressed me a lot. Work there is not considered as a duty but as love, worship and devotion. Nobody is pushed into anything, everybody is totally self-responsible. This way of expressing creativity is a total new approach never experienced before.

Rajneeshpuram is also an experiment to integrate our highly advanced technology with the ecological needs of nature, a city which became in a very short time autosufficient.

Bhagwan Shree Rajneesh this unique Master stopped speaking a while ago, but His energy is felt everywhere. Seeing Rajneeshpuram I understood that Bhagwan even in silence is creating through His disciples a total new vision of community fundamental for the future of humanity, threatened by an unaware use of technology. A deep respect for nature and human beings, a combination of science and religion are the only hopes we can have for our survival.

The experiment of Rajneeshpuram has to be known by the whole world, without the compassion of Bhagwan Shree Rajneesh I doubt it could happen.
