To Whom It May Concern

I have heard that you intend to deport Bhagwan Shree Rajneesh from the United States. Bhagwan lives now in Rajneeshpuram, Oregon.

Bhagwan Shree Rajneesh played a very important role during my medical studies and my work as a doctor. The contradictions in modern Medicine in the industrial countries had made me more and more uncertain and helpless. On the one hand is the steady increase in specialized technical equipment, the medical and scientific research striving for more and more facts and information, and the escalating costs of medical care. On the other hand there is no noticeable improvement in the health of the people. In fact, there is a marked deterioration: an increasing addiction to tablets, alcohol and drugs.

Modern Medicine urgently needs a radical change in outlook. Here Bhagwan Shree Rajneesh can be of tremendous help. In his lectures (recorded now in books and tapes) he has pointed out very often to the causes of physical and mental illnesses and the means of healing these. His views on the subject can be summarized in a single short sentence: "Only love heals" (Bhagwan Shree Rajneesh).

I am convinced that the work of Bhagwan in Rajneeshpuram in the field of Medicine can be of tremendous help for us all. Hence I request you to support the extension of Bhagwan's stay in the United States.
