

August 2-1983

To whom it may concern.

After being in Rajneeshpuram this summer during the festival, I feel I have to write to you. To me it feels very important that Bhagwan can stay in America, because of his health, this gives also the possibility to create a buddhafield. It is beautiful to have such a buddhafield. I experienced that it is very touching to be in such a buddhafield, to be in the presence of the living master with all his sannyasins, to feel the living energy, in which everybody can be who he is.

Fortunately this buddhafield is spread all over the world. It also can be felt here in Holland. In this place where I live, I also feel the buddhafield in doing all the things we're doing. In giving training, festivals etc. It is beautiful that being here together as sannyasins Bhagwan's love and energy can be felt and be offered to all the people who are interested in it. It is beautiful that people can feel something of the buddhafield here and notice that there's something really important happening.

with love

Swami Dhyani Saddhen
