July 19, 1983

To whom it may concern:

I am a scientist and an artist. I have studied biology, including zoology, botanics, genetics, ecology, etology and environmental care. I graduated in endocrinology (Ph.D) 1967 at the University of Stockholm. During ten years I was a teacher at the University. After that I have been working at the Karolinska Institute in Stockholm with teratology. Among other things I investigated the effects of drugs and herbicides on unborn mammals. During one year I participated in the preparation of a large exhibition of "soft" technology for the future (ARARAT) at the Modern Museum of Stockholm. I have also studied art and design, 5 years, at the Art School of Stockholm (glass and ceramics).

Most of my grown up life I have been reading psychology and "human sciences" of all kinds in order to get a whole view of life. My urge to understand myself and my fellow man led me to a workshop with a Rajneesh therapist. It was an overwhelming experience. I heard Bhagwan lectures for the first time and everything he says goes right into my heart and for the first time in my life my intellect did agree. All the scattered pieces of my knowledge and understanding of life fell into place. He is a man with exceptional gifts and knowledge and the ability to explain it. All intelligent people who get in contact with his writings are bound to be his admirers, disciples.

The war against everything that is alive inside human beings in the name of "upbringing" or religion is the root of all fighting. The teachings of Bhagwan have given me hope that this vicious circle can be broken. The love and care I met at my first visit to Rajneeshpuram this summer is unbelievable. The whole city is run by love, intelligence, humor and care for all that is alive.

As an ecologist I am impressed. The spirit of the presence of Bhagwan brings out more love and energy than I ever believed was possible. He is the adventure of my life.
