TO WHOM IT MAY CONCERN,

I am a medical practitioner practising in the field of the psychological basis of physical disease. I have been trained as an M.D. in Australia, Europe and the United States.

I am considered to be one of the foremost authorities in my field in this country.

I am a member of the International Transactional Association, registered in California, and the International Academy of Preventative Medicine, registered in Kansas.

I have written a book on the psychological basis of physical disease which will be simultaneously published by the publisher Angus and Robertson in Australia and the United Kingdom in March 1984.

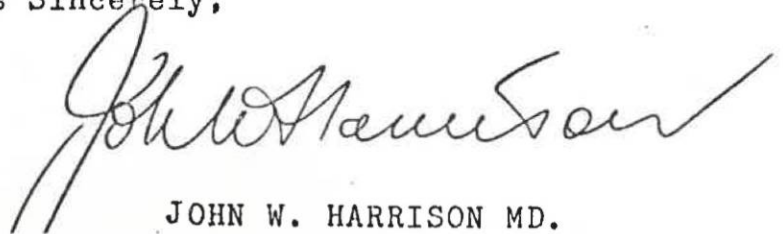

Over the past ten years of my training in this field of medicine I have had considerable contact with sanyassins and the teachings of Bhagwan Shree Rajneesh.

I have found the writings of Rajneesh to be at the forefront of understanding in the relationship between mind and body, the cornerstone of this work.

I consider Bhagwan Shree Rajneesh to be a great scholar in the area of human relationships and personal contentment, two areas which will in the next decade be much pursued as the causes of much physical illness.

Please contact me should you require any further information,

Yours Sincerely,

JOHN W. HARRISON MD.
