## TO WHOM IT MAY CONCERN.

I wish to acknowledge and give my full support in favour of the application for permanent residency, in the United States of America, of Bhagwan Shree Rajneesh.

I first became acquainted with Bhagwan's teachings whilst working with psychologists in San Francisco and found Bhagwan's work to be exceptional in the area of Self Responsibility and consequently have integrated the same into management and commerce. His ability is recognized internationally and he is a sought after and world renowned consultant and speaker in science & art.

I have experienced fourteen years as a successful Managing Director & consultant of five companies, dealing directly with business management and in the field of human behaviour. I am responsible for the creation of Harmony Health Village which is a holistic centre, conducive to people realising their potential in the areas of health, success & awareness. This is my establishment and has operated successfully for 3 years.

My opinion is that of a non sannyasin but is based upon a respect for Bhagwan & his teachings. I have no reservations whatever in recommending Bhagwan Shree Rajneesh's application.

Yours sincerely,

Colin Robert Hayes. (Managing Director)  
Harmony Health Village.
