Miasto, July 30, 1983

To whom it may concern.

Meeting Bhagwan Shree Rajneesh has been very beneficial to my life in many ways. It helped me to reach a greater balance in the various components of my personality, and, through the practice of His meditation techniques, a greater fulfillment in all gestures of everyday life, working, eating, relating to other people etc. My life has become more intense.

My first approach to Him was through His books, which helped me to go through a time of confusion and depression and to come out of it awakened to a desire to live life as totally as possible. Later I decided to give up my former life to become part of His community Miasto Rajneesh, where I have been living presently for over two years.

Here working and meditating I realize how my relationship to Bhagwan becomes ever more important to me, and how it helps me, beyond the inevitable stress of strenuous activity, to constantly find again my inner centre.

It was hard for me to intellectually understand how the silent presence which is now Bhagwan could influence my life. Only direct experience of it, especially the experience of sitting silently with Him during the Celebration in Rajneeshpuram, made it clear to me that, mysteriously, the miracle happens.
