TO WHOM IT MAY CONCERN

First of all, I met Bhagwan 3 and a half years ago, still in India.

I was studying in that time geology in Saarbrücken University, Germany. I was very much interested finding out and studying the ecological resources, and coordinations and foundations, under which man exist. The things I learn in that University did not satisfy my interests very much so I looked for a wider view to understand whats going on on this planet. That was the time I met Bhagwan. He gave me, when he was still talking, a very vast vision of the human potential, of the human possibilities of growth. He gave me such a deep understanding of inner and outer nature of man, and the circumstances we all live in, as I have never heard it before. I stopped the university and took sannyas.

Now this is what is happening here in Rajneeshpuram. The realisation of his vision, to create a city, where man can live in total harmony with himself, with others and with nature. He is in silence now, but that doesn't mean that we all can't feel him. He inspires us every day with his being present and close, with his love, and it is a gift for me to live in such a place, even when it is only for a few months. I am staying here until the end of October and I'm doing the Rajneesh Rebalancing Course on the Rajneesh International Meditation University. What we learn here is a new understanding of the human body, that includes anatomy, functional understanding of the body, body reading, different massage techniques and energy work, that means bringing the body back in its natural balance and harmony. This whole course is such an opportunity which I can't find nowhere else in the world. It is such a gift for this country, to have Bhagwan here, in fact for every country. You should acknowledge that please.

Sincerely,

Swami Satyam Ananto
