To whom it may concern,

I am Mechanical Engineer (B.E. Mech.) from Gujarat University, Ahmedabad, India. I have my own industry making textile machinery. I used to regularly attend Bhagwan's discourses and meditate since 1972. Bhagwan Shree Rajneesh has given new vision to look at outer world and meditation to look within.

Following are the gift from Bhagwan to my life:

1. The whole world is play of God with all contrasts, which helped me to drop all divisions, hate, anger, jealousy and all other kind of negativity, and love started flowering.
2. This vision helped me to remain rooted into this life, to live this life as totally as I can, that helped me in my business. Up till now there is not a single textile machine in India which is designed by an Indian. India has always copied machineries of all kinds. I did not like that, I decided to design a 100% Indiginous machine, I designed two and I have been very successful in my venture.
3. Now my life is nothing but celebration.

Thanks,

Meghajibhai V. Patel
