TO WHOM IT MAY CONERN:

My name is, Richard Beymer. I am a film actor and director. I am writing this letter to add my voice to the meny thousands who have benefited from the writings and teachings of, BHAGWAN SHREE RAJNEESH.

I have found, BHAGWAN SHREE RAJNEESH, tō bē person of unique ability and wisdom, in the areas of science, art and philosophy. His wisdom and insight goes far beyond the obvious, penetrating the very depth of whatever subject he is discussing. He is a true teacher, in that he is not just repeating something read or related to him, but rather he is passing on the knowledge of his direct experience. In that sence he himself is a scientist, convaying the results of his research; in this case the result of the expantion of consciouness, there by inhancing creativity.

I first began reading, BHAGWAN SHREE RAJNEESH, in 1976. He has added immeasurably to my understanding of the nature of art and science, and mostly how this pertains to the subtle nature of the SELF, in relation to man in his enviornment both inner and outer.. That is to say, he has given me a holistic view of life, not just from the point of view of the everyday world of external needs, pleasures, wants and desires but also of the more perfound aspect of existance - THE INNER-LIFE - where ultimately all inseration and creativity comes. It is here, in the world of inner silence, the world of the sub-atomic scientist, that he has been able to define so simply and eloquently. It is the

world of the great seers. It is the world of anyone who wishes to comprehend beyond the obvious.

BHAGWAN SHREE RAJNEESH, is a guide into this world of a greater reality. And here he is able to return and impart the knowledge of the inner self, that we may all partake in our ultimate birthright of infinite creativity and peace for the betterment of all.....

With Respect,

Richard Beymer
