To Whom it may concern,

For the last ten years of the thirty years that I have studied and practiced the Art of Architecture, I have become increasingly aware of the spiritual teaching of Bhagwan Shree Rajneesh. His views on the nature of human existence have been an inspiration for my life and work.

When I heard of my country's resistance to allowing him to remain and live in the United States, I was appalled by the ignorance that could deprive us of the presence and influence of a man of Rajneesh's stature.

Please lend my voice to the many you must already have to protest the denial of citizenship for this great man.

Most sincerely yours,

  
Len Pitkowsky
