

JULY, 1983.

TO WHOM IT MAY CONCERN

This letter is written to support the application of Bhagwan Shree Rajneesh to obtain residential status in the United States of America.

At present Bhagwan lives and works in the city of Rajneeshpuram (Oregon) with many disciples engaged in preparing and distributing his writings and teaching all over the world.

As a trained nurse, midwife (SRN, SCM) and a Clinical Psychologist (B.A. Hons, M. Psych.) I am well aware of the benefits to be derived from Bhagwan's teachings in comparison to other authors and therapists at present.

In my role as the Clinical Psychologist in the large General Teaching Hospital (Royal Perth Hospital - bed capacity = 1,000) of our city, I have the need to be able to select between appropriate psychotherapies, communicate relevant parts of available literature to clients, and to be aware of my own needs and supports while engaged in demanding work.

I have found the books and tapes produced by Bhagwan to be of help in my work and would clearly support any moves to discontinue of his work

in the best possible environment.

In my experience I have yet to find another single author who has the ability to integrate meaningful information from so many sources (eg: Psychology, Sociology, Anthropology, Religion, History, the Arts) to produce written work of relevance to living in our world now.

Sheryl Pope.

SRN., S.C.M., B.A. (Hons),

M. Psych.

Clinical Psychologist

Royal Perth Hospital.

West Australia.
