To Whom it May Concern:

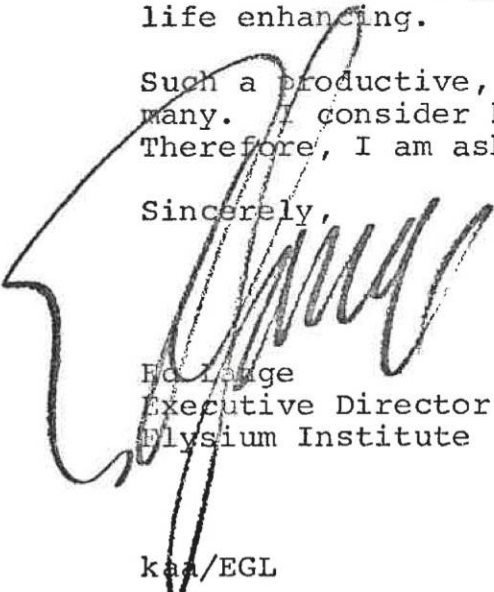

I am the founder and Executive Director of the Elysium Institute, a human potential center, in Topanga, California.

It is a non-profit organization whose purpose is research and dissemination of information in the behavioral sciences relating to the body taboo neuroses so prevalent in our culture. Workshops and self-help group seminars are conducted regularly.

At Elysium, seminars led by advocates of Bhagwan Shree Rajneesh have generated positive feedback. The books and tapes provided were of substantial support and were, in the opinion of the staff, life enhancing.

Such a productive, positive personality brings inspiration to many. I consider his presence in the United States an asset. Therefore, I am asking that he be allowed to remain in America.

Sincerely,

Ed Lange
Executive Director
Elysium Institute
