Lausanne, le 19 th july 1983

I am 28 years old and working in Switzerland in two different fields: as social worker for the Swiss Administration and as an educator in a home of the International Christian Women's Association.

I studied the social and psychological sciences in Lausanne's University, getting my B.A. in 1977.

My approach changed during these studies from sociological towards psychological, and I became very interested in all the different psychotherapies or means to help man to be more aware, to open and to connect with creative energy. I studied with G. Boyelsen from England and with G. Pijoan from Switzerland bio-energetics. During this time, I heard about a place in India, in Poona where therapists from all over the world gathered around a master, Bhagwan Shree Rajneesh; I decided to go and visit there, feeling a need for a wider approach than that experienced till now.

After the usual results of ordinary psychotherapies, what was happening there was like a revelation. Bhagwan Shree Rajneesh was verbalising the different phenomenons in religious discourses that He would give every morning: they included a total approach to man, in all His dimensions, and I got impressed by His psychological and social views: He included everything known till now, putting it together (instead of separating and specialising) and yet going beyond it, reaching a higher level where Jesus-Christ is next to Wilhelm Reich, where love and spirituality are one with everyday life, helping each other to grow.

following)

And this was the touch, the most exceptional and the most simple touch that was missing till now.

He got it, He reveals it inside each of us, and we reveal it inside the people we meet or work with.

I feel very grateful towards Him and I feel His presence on the Earth is a real gift for everyone in every field.

Sincerely yours

Christiane Hallpatch
