To whom it may concern

As a psychologist and psychotherapist I am working in the West German Human Growth Movement doing groups and individual work (therapies, counseling, meditations and bodywork) organized on my own as well as in municipal health centers.

I am very much indebted to Bhagwan Shree Rajneesh as I owe to him a tremendous amount of inspirations concerning my working professionally with people as well as concerning my own personal growth. I had the opportunity to meet him personally and got to know a lot of his books as well as lectures registered on tapes. A few years ago I was so fortunate as to get several trainings in the Shree Rajneesh Ashram in Poona (Shiatsu, Intuitive Massage, Postural Integration), as it is known, that the worldbest therapists gathered at that time in his Ashram.

Bhagwan's capacity to bring together Eastern and Western Philosophy and Psychology is an innovative and outstanding tentative which has spread all over the world and is attracting a tremendous amount of interested people of all kinds of professions, educations, classes etc.

It is my firm wish that Bhagwan Shree Rajneesh might stay in his new built Ashram in Oregon/USA.
