July 22, 1983

To whom it may concern,

I am a Psychotherapist. My special area of expertise is working with Adolescents - especially the delinquent, the deprived and the seriously disturbed. I have known much success treating these youngsters and their families. I have directed two Adolescent Family - oriented Day Treatment facilities. I also have had a private practice for ten years.

I have a Bachelor's Degree from the University of California in Los Angeles. I have a Master's Degree from the University of California at Berkeley. I have had a license to practice in the state of California for the past ten years.

As part of my desire to grow professionally, I traveled to Bhagwan's ashram in India in 1977. I wanted to learn from him. As a direct result of this trip, I concluded that Bhagwan's teachings are the most important statements being made today in the Social Sciences and in the field of Psychotherapy. He is a great proponent of Meditation as a tool toward mental, emotional and psychological growth. He is an expert in the application of Meditation in the field of Mental Health. The West is beginning to absorb the teachings of this great thinker as a means of coping profoundly with issues of survival. It is also important to realize that his concept of Love has deep and far reaching impact on the healing professions as well as on the world at large.

Bhagwan is one of the leading theoreticians of our time. It is a credit to us Americans that he chose the United States to pursue and teach his ideas. All he has said is on tape and written in volumes of books. Now he teaches by example at Rajneeshpuram in Oregon.

I strongly urge that Bhagwan Shree Rajneesh be allowed to become a citizen and remain in this country. He is of the caliber of men like Einstein, Fermi, Von Braun and many other foreigners who contributed so much to America's predominance in the world's intellectual community.

Sincerely yours,
