Buddha Field Care

To Whom It May Concern.

I have been a Sannyasin for eight years, and the changes Bhagwan has brought in my life in these past eight years are even surprising to me.

I was brought up in Africa and then lived in London, working as a secretary and then got trained as a corsetaire.

I came to know Bhagwan through my sister. I joined the Ashram in Poona/India in 1974 when Bhagwan used to come out for evening darshan. After Bhagwan went in silence, the energy became even stronger for me. I enjoyed being in His presence much more - so much that at times it became difficult for me to even speak after Satsang.

In Africa and London, I worked for money but after knowing Bhagwan and joining the commune,

I started working for the family, love and harmony - sharing with all those who wanted to participate in His energy and presence.

In the past two years I have changed much more than I was in Pune. I feel, I have become much softer, my body has changed, it has become more healthy and beautiful. I share more than I used to, I no longer work but work has become worship. I want to do whatever comes on the way, there is no more choice, whatever comes, it's His grace. I want to look after all the sannyasins - it's such a grace that during festival when thousands of sannyasins gather at Rajneeshpuram, that I am one of Bhagwan's disciples who has been given an opportunity to look after them.

Boy, am I proud to be a Sannyasin! I am so strong and proud of being a sannyasin that no power on this earth can change this.

Because of His presence, we are and I am capable to do what ever comes along. It is a miracle - How the temples and people merge with each other - we are one. The love that

flows between sannyasins is a dance which has only happened because of this Buddhafield where our master resides - and we are grateful to being given a chance by the existence to be with Him.

This is an Oasis where Heaven has come down to share, to be with Bhagwan. Won't you join the dance too!

Love
