

28th July 1983

to whom it may concern

This is a letter in support of Bhagwan Shree Rajneesh.

My own experience about him is unforgettable.

I've been a professional musician in Italy for five years and at that time I was also trying to create new ways to make music, to create a synthesis between western and eastern music -

So, I decided to visit India for a period and I came across Bhagwan Shree Rajneesh and the work that was happening in his Commune - His teachings, meditations and therapy groups have been able to open my heart immensely -

I feel really grateful to him.

This year, I came to the second world annual celebration and I saw Bhagwan after two years, and I couldn't believe that he has not yet been accepted as a permanent resident in USA.

The world is so full of ugliness, and I didn't come across a place where people are living on happy life -

Here everybody is so loving and beautiful, and that because he is here he keeps on teaching how to live life totally and happily -

It is amazing also to see a desert turning into a beautiful garden, life is coming back, he really inspires all of this, his presence, his silence is an unique experience, I really suggest everybody to come and see -

I can say one thing, I would never have come in a place like this if he were not here -

It is a great opportunity for the free world to let Bhagwan Shree Rajneesh create this synthesis between EAST & WEST -
