TO WHOM IT MAY CONCERN

Since I have been a samnyasin, this is now for more than 5 years, I realize, how much my life completely changed. I been working for many years as a secretary for different companies. The way how I worked in it, I came in the morning, did what I had to do and left. Through my love with Bhagwan, through his teaching, something got changed. The first time in my life I come in real contact with people. I reach with my heart the person next to me and also receive the other one. More and more I become aware that I worked for so many years like a machine, not being aware of myself, not being aware of the others. I feel now having more responsibility for myself in my worship what means that mistakes getting much more less, because I care for my work and I like to give my best.

During the festival the worship became very intense, so much work we needed to do. But through our each other loving and caring, we got much more and much better done, than if we would worked outside, without Him. This place is so different and so incredible beautiful and it is, because He is here. His silence is bringing me so deeply in contact with myself that my own love brings awareness and life in my worshipping. His teaching brings out to give much more, I feel I'm able to give and give and there is no end. Doing more hours is fun. Especially the worship here is with so much love, that each moment we do is so incredible beautiful Bhagwan's teachings are giving all of us the capacity for doing more things we normally wouldn't do, because we risk more, we taking more responsibility for us for others. I'm thankful for all his teachings.

To know He is a very outstanding person for exceptional abilities.

Sincerely,

Ma Anand Suniti
