Date 23rd July.83.

This is to put on record some of my observations during my contacts with Acharya Shri Rajneesh. I came in contact with him about fifteen years ago. When he was staying in Bombay I had several personal contacts and when he shifted to Poona I used to listen to his discourses on tape and read them in the books.

His grasp on all religions is unique. He has been able to reach very deep in the subject and has often been able to arrive at a very new angle of observation.

He is able to show the old prophets and old religious scripts in new light. His interpretation of the subject is such that the present day modern educated man is able to understand, get interested and go deeper in religious subjects.

He has developed a new way of thinking and has developed a new fundamental base for living for the present and coming generations.

As his views spread it is going to make a big impact on the present civilisation. If it does in good time we may be able to save the human race from self destruction and lead it to Superman.
