TO WHOM IT MAY CONCERN

I am a qualified teacher of religion in the United Kingdom, graduating with an honours degree in theology and education at the University of Leeds. I studied under Dr. Michael Williams, who is well known in his field both for his university lectures and published theological articles.

I heard about Bhagwan Shree Rajneesh some six years ago, and as a qualified teacher myself I can testify that His teachings are the most profound and brilliant that I have ever heard. I have read many of his religious books and listened to hundred of tapes of his discourses, and have gained many new insights and understandings into my profession as a result.

The depth of his ideas on a very wide variety of subjects and his clarity in communicating them, makes him the most brilliant holistic religious teacher of our time. His teachings in the area of human consciousness in particular are valuable to teachers like myself, as they help us to be aware of the real needs of those we educate.

His presence would be an invaluable asset to any country.

Yours faithfully

M. C. Blackden
