

To whom it may concern

I am qualified as a high school teacher, psychotherapist (Gestalt therapy) and have a university degree in education (Diplom-Pädagoge). I am experienced in rehabilitation work with drug addicts, alcoholics, and people released from prison. I usually worked with groups of people in agencies which were financed by the state (commune for drug addicts, hospital for alcoholics), using psychological and educational treatment.

Interested in ways and methods to change people's negative attitudes and behavior, I came into contact with Bhagwan Shree Rajneesh and his religious teachings in Poona and later in Rajneeshpuram, and I saw the rapid positive transformations that happened around him.

Like many other therapists, teachers and social workers all over the world, I started using Bhagwan's meditation techniques in my work and I saw the healing effect they had on the clients. Later, with the understanding of Bhagwan's approach towards social work, I found that he adds a totally new dimension to it.

His religious teachings and their very positive effect show that he is a really outstanding and revolutionary person in the field of social work.
