TO WHOM IT MAY CONCERN

Re. Bhagwan Shri Rajneesh

I am happy to support the current movement from many parts of the world to support the application of Bhagwan Shri Rajneesh to remain as a permanent resident in the United States.

I am not an adherent of his religious philosophy, having too little acquaintance with it. I have, however, during the past year had considerable contact with some of his followers in Perth, Western Australia, and have been very impressed by the impact of his teachings upon them and their way of life. I hope to become better acquainted with his teachings in the near future since I have become persuaded that his loving concern for life and his practical approach to teaching individuals how best to use it could prove to be of crucial importance to this planet.

As a school principal I believe that his therapies could be incorporated into any school system with great profit to the children in it at a time when all over the world we are asking schools to find ways to counteract social malaise at crisis levels.

On a personal level I have derived great physical and emotional benefit from my brief contact with his followers and would think that any government in the world should be proud to endorse his presence in their country.
