

To whom it may concern,

Hi, Being a lover of Bhagwan Shree Rajneesh for two and a half years has shown me totally clearly, Bhagwan is without a doubt a person of exceptional ability, it's really simple!

You see through my life I've grown into the fields of arts and design specializing in landscaping gardening indoors and outdoors. My enthusiasm grows more and more. I've worked in the Vancouver area for two to three years now with two companies. Through this art in the garden my interest in nature, in love and then into eastern spiritual teachings ha/ha/ I found most of those spiritual teachings quite boring though, the garden was far more fun.

Then came Bhagwan, Wow/ when I met Bhagwan things totally transformed. His teachings totally influenced my attitude towards my work in the garden. Just my enthusiasm alone quadrupled. Bhagwan's teachings are of love, grace, divine kingdom of god and of course, celebration. We all know mother nature right, well the kingdom of god goes hand in hand with the garden of mother nature. ha/ha/ So you see Bhagwan's respect and tremendous understanding of nature have influenced me to see in my landscaping the true life and harmony in the garden. And most of all how nature is always enjoying so ~~very~~ I enjoy with my art in the garden. Bhagwan has shown me the garden is one place where god can be found. Sounds pretty spiritual eh! well it's really down to earth! get it. ha/ha.

Also. Visiting Rajneesh puram recently has been the most outrageous insight into the art of gardening let alone the quality of love everywhere. In fact that's just it, it's the love that is put into the garden, the art of using the land, in Rajneesh puram that is outrageous. The skills can be learned anywhere, but there is something different. You see you guys, Bhagwan's presence, his being, his love has inspired a whole! elevation in the quality of life, the garden is only one expression, an expression I have chosen and expertise in. Examples of what

expressions I saw at Rajneeshpuram that are outstanding are: a man made reservoir, capable of irrigating quantum desert land: small check dams throughout the creeks in the ranch: excavating riverbanks with seeding grasses: of course regular beautiful landscaping around rural-urban buildings: and get a load of this a full scale 60-acre veggie garden: a multi greenhouse area, and more in such a short period of time.

As Bhagwan has said in the past his vision will be an oasis in the desert. His vision is happening, his inspiration, his presence of love is creating right this moment this oasis of love. The gardening in Rajneeshpuram is only one outstanding expression of Bhagwan's presence.

Bhagwan is capable of elevating any profession or skill simply by his presence of love and buddhahood he has inspired me to search to see my buddhahood through love and my love for the art of gardening

Have a good time!

Sincerely lots of laughs

See Nichol Yee
