

July 18, 1983

TO WHOM IT MAY CONCERN:

I am 57 years old and an artist. I studied art with Casorati, the founder of Pop Art, Music with Pachner, Therapies with Ruffini & Gasca, founder of the Psychoanalysis & Psychodrama in Italy. My paintings have been in 12 Expositions (at the Museum of Neuhurtel - Switzerland, and Enskede, Holland, among others). Also at the Christian Stein Gallery, Grand Prix of Monte Carlo and at the "Galleria Parisina". I worked for three years as art co-ordinator in the psychiatric hospitals of Turin, Italy, together with Basaglione, under the supervision of Agostino Rirella. I did psychodrama seminars with Lemoine studying the relationship between art and therapies.

But the real encounter with Art and Therapy happened only in Poona, at the Bhagwan Shree Rajneesh ashram. All the schools that I studied in the social, scientific and artistic fields became complete and their vision was broadened by the knowledge of human kind that Bhagwan gave me through his teachings and his meditation techniques.

My creative abilities have reached a scope that never existed before. To be now part of the birth and growth of Rajneeshpuram is to me the most complete realization of my artistic and creative abilities.

Only a man with exceptional abilities could have enriched my life and my artistic understanding in such a way and for this I am extremely grateful.

Fiorella Pachner
