TO WHOM IT MAY CONCERN

I am a psychologist, graduated from Fribourg College in Switzerland in 1970. I am working with groups and in counselling. Right now I am also a student of an Art College.

I came to Oregon, to Bhagwan, just to see. And I did workshops and meditations and I saw incredible changes within me and other people. As a psychologist I know what's possible to happen in therapies and I feel competent to "judge" what's happening here.

People are getting to their own core, to life, to love (to which psychology pretends to lead people).

I have never seen a place in the world with so many alive, creative, beautiful people.

Eva Oswald
