

Brussels, July 13, 1973

Dear Sir,

I want to share with you what Bhagwan Shree Rajneesh brought into my life. Before I was a man with a lot of problems. During this time I used to have very little contact with reality. Most of the time I spent my day dreaming because I was so afraid of people. After school I got a small job in computer business.

One day during a bioenergetic group the therapist used the dynamic meditation of Bhagwan Shree Rajneesh, it was so fantastic that I decided to learn more about this man. Some months later having got already more energy from the applying of his teaching, meditations and group therapist here in Brussels, I went to India to become his disciple. When I came back to Brussels, I could see now much my outlook to life had changed: contact with reality and everyday life, more confidence in my own abilities, knowledge of me

end of what I lived, more decision making,
in other words I had started, Thanks
to the work performed in the ashram of
Bhagwan Sri Rajneesh in Poona,
to take responsibility for my life to
the point that I even have started a
business where I am general Manager of
an Advertising Agency quite successful
and also President of the Board of
another Company.

From the above you can see that this
man is really precious. He is such an
exceptional being and spiritual master
who is the only one in all human being
History who has succeeded to mix
~~is~~ Spiritual and Material in every
day life so that every body has to
become more aware, more enlightened
to make life much more easy.

Sincerely Yours.
