To Whom it May Concern:

I am an educator having worked with students from birth, preschool and 80 year old college students.

I am a grandmother and am presently working with a mental health organization funded through H.R.S., Health and Rehabilitative Services in the Homestead, Florida area.

Here, again my expertise as an educator, has proven valuable in helping others gain parenting skills which, not having experienced those as children, were unable to provide this important knowledge to their own children. My work, I feel benefits the future parents of our community.

I have had the privilege of hearing and getting to know Rajneech, a man of exceptional qualities, through his poetry, prose, video tapes, books and most importantly through the people truly involved with him.

The honesty, integrity, peace loving beauty of Rajneech, permeated all of these peoples lives and their children which also benefits greatly the future of our society.

Rajneech is truly a man of exceptional abilities in Science and art. More people like Rajneech would without a doubt, make this beautiful America of ours a more peaceful environment for us and our children.

Sincerely,

Belle C Gendler
