To whome it may concerne!

I am a professor in a high-school, teaching the subjects Biology and Fine Arts. I am the coordinator for the Fine Arts at the "Bundesrealgymnasium 22" in Vienna/ Austria. Friends, who became disciples of Bhagwan Shree Rajneesh, told me about his work and so I started reading books of him. I became very interested in his ideas and finally I went to Poona in 1980. to participate in some of his personal growth programs. These programs and the discourses about education and individual support for children had deep going influence for my work as a Teacher. My relationship fo pupils got a totally different understanding. His ideas of growing every pupils individual talents and personality convinced me very positive.

For me there is no doubt that Bhagwan Shree Rajneesh is one of the rarest and precious teachers for humanity with most extraordinary abilities.

Sincerely

*Ernst Schmid*
