

July 13 -

C120

To Whom it May Concern,

Long ago in my University Years, I remain unsatisfied. I was finishing a degree in Pharmacy and one in Socio-Ethnology (1972). I wanted to go into psychology, psychoanalysis, anything that could bring me closer to understand the mystery of man. I realized I was in search for some authentic religion.

I found Bhagwan in Poona in early 76 and became a disciple. This was it and I came to live there because this amazing man was the essence of a true religion. He was speaking at that time although saying that he would one day go into silence, when he would feel it appropriate, for only silence is the answer. That's what

He is doing now, especially during festival when setsangs and darshan happen.

Here in Oregon the Buddha field is happening, He is the force that makes it happen, He is the love that makes it possible. And the proof is there in front of your eyes: who else in the world could have done what has been done in Rajneeshpuram? This exceptional man is a blessing for any country and this is true for his friends & lovers but also for the state & the country itself culturally as well as economically.

I realize more and more how this exceptional man has given to me and to so many of my friends around the ability of being a positive force in the world, i.e., bringing a new quality in ourselves.

Sincerely -

Sw. P. Doshi
