To whom it may concern,

To express the effect Bhagwan has had on my life + work is to describe the most remarkable force I have yet to experience.

His presence makes our community possible makes it the only one of its kind on the planet. It enables us to work in harmony with the land + each other. His presence here is what gives the love + energy for us to restore the environment to its balance + beauty. It enables us to restore each of us to our birthright of full human potential.

It takes time to restore the land. It takes time to heal people + help them trust their inner being but its happening. Its all happening here in His presence, through His love + guidance. More + more is possible. I stretch + become more.

This is a University like none I ever found before. I am learning how to really live my life really live. Its all I ever wanted to learn. The fulfillment is incredible, profound, the peace

of being everexpanding.

Having Bhagwan Shree Rajneesh here with us creating this oasis for the heart + spirit is a rare exquisite opportunity. Its preciousness + value exceeds all else my life's experience had offered and that was much.

In love + remembrance  
of the opportunity  
He is

Ma Anand Asha
