To whom it may concern:

I have been visiting Rajneeshpuram last year and this year for the Annual World Festivals and am staying a few weeks to participate in the Ranch hiring Program.

I have been a pharmaceutical executive for the last 16 years since 1976 I was Managing Director of a Pharmaceutical Company in Switzerland. I have become acquainted with Bhagwan Shree Rajneesh first 3 years ago through one of his numerous books.

Bhagwan has radically transformed my existence. He has given me a clear understanding of the nature of human being and a sense of purpose in my life.

In my professional career I have met many doctors and psychiatrists. I'm convinced that Bhagwan has an understanding of the psychology of human being far beyond the horizon of present psychology. His concept of Self-Actualization can lead every Human being who wants to participate in it to the fulfillment of his total potential.

Since I have met Bhagwan and started participating in various programs set up in his communities around the world, I'm dealing with people in a much more relaxed way, seeking with partners much more cooperation than conflict, the stress in my social and private life has been greatly reduced. More love is flowing in and around me than ever before in my daily life.

One of the most remarkable experiences here on the ranch is that work can be transformed into worship, into a way of expressing thankfulness to existence for the simple fact of being alive. After a few days, I started experiencing a deep joy in "working" here, regardless of the long hours.

Living in this community, with so many people who are in tune with Bhagwan, a special energy field is created that gives me for the first time the trust that my life can be totally fulfilling.

It is my sincerest conviction that Bhagwan Shree Rajwesh carries a message of tremendous importance for the world and for the future of humanity: a message of peace, love and joy. And he has the leadership to inspire thousands of people to strive towards this goal.
