TO WHOM IT MAY CONCERN:

I was a high school teacher for 5 years and stopped teaching children because I found it very exhausting, if I was to do the job properly. I did not teach again for several years and missed it, as I had always found teaching a very fulfilling profession and rewarding personal experience.

Once I became a disciple of Bhagwan Shree Rajneesh I began to relax a lot more and not get tense. As a result of this transformation on the psychological level in my life through His meditations and teachings I was able to resume my teaching career 2 years ago.

Even though I am wearing orange clothes and a mala now my classes are more successful than they ever were before. Without the help and guidance of my master I am sure I would not have developed the confidence and ability to resume my chosen career.
